

I think its OUTRAGEOUS for the National Association of Broadcasters to think that they can dictate what I can and can not listen to. I pay for these services and it should not be up to the National Association of Broadcasters to say XM Instant Traffic & Weather should not be able to air. If they really have a problem with it they should create something comprable to it. I think XM Instant Traffic & Weather is a God send. Its no different than the information we are geting on AM radio, only its more often and WAY MORE CONVIENENT.

I respectfully urge you to REJECT the NAB's petition 04-160.

Thank You
Philip Vera
